

# Occupational Map: Transport and Logistics

This is one of 15 occupational maps that group together occupations that require similar knowledge skills and behaviours. Career pathways and occupational clusters have been used to provide further grouping of occupations, with the pathways indicating options for likely career progression. Every apprenticeship standard has been captured, as well as other skilled occupations where there is a substantial requirement for technical knowledge and practical skills. There is one career pathway shown for Transport and one for Logistics, with the Transport pathway split into several clusters. The technical occupations in both pathways have been identified as suitable for learning via apprenticeships only, so Government does not intend to launch T levels for this route.

**Occupations in green:** Standard approved for delivery  
**Occupations in amber:** Standard published  
**Occupations in red:** Standard in development  
**Occupations in black:** Standard awaiting development  
**The number shown in brackets ( ) is the level of the apprenticeship (if known)**
